Learning a new skill? Kids gets THREE!
Academic vs Behavior
Increase Positive Behavior

Teach  
Model  
Reinforce
Ways to demonstrate...
include the kids (what descriptors can they think of?)

Feelings
- Mad
- Not OK
- Great

Behaviors
- Stop
- Think about it
- Good to go
Strikes

- Shows Grace
- Establish Consistency
- Controls Negative Behavior
LOGICAL Consequences

These consequences do not naturally occur as a result of behavior, but are intentionally planned by teachers and administrators. Logical consequences are similar to what would happen to an adult in a similar situation, therefore teaching students skills that they will need to be successful later on in life. Logical consequences need to be related, respectful, and reasonable.

Related...
Clearly connect to students behavior

Respectful...
Consequences given with empathy and respectful tone of voice

Reasonable...
step directions...why can’t they follow???
3rd Person Contact
Addressing the “Runner”

Safe Place to Run → Holding Hands → Reinforce “Stay by Teacher”
### Ways to Define Behavior

</tbody>
</table>
For every classroom

1. Schedule
2. Rules (just three)
3. Reinforcement (whole group?)
Every kid can benefit from

1. If you...then you...
2. Behavior Map
3. Teacher Compromise
If you are saying it **more than three times** then you need a visual!!!

1. Use words (simple, to the point)
2. Sketch it out (quick, temporary)
3. Pictures (let kids be the illustrator)
3 Positives...

to teach and use with students the minute they enter the building (each day)

Eye Contact

Smile

Touch

3 Positive Touches:
  high five, shoulder squeeze, side hug
3 ways to teach...

Ways to Achieve INDEPENDENCE

- Daily Job
- Reinforce decreasing adult support
- Set a goal (use visual timeline)
3 Positives for every Negative

3 positive statements for teachers & students...
